## Residential

The lobbies have been sensitively designed as contemporary spaces that draw on the industrial heritage of the building while delivering the luxury and comfort expected of high-end residential living.

# SPEIRS MAJOR

Bespoke 22m deep chandeliers in a stacked green glass design are inspired by the form of electricity pylon isolators, referencing the past use of the space in supplying power to large parts of London.

## Roof Terraces

The light creates a welcoming ambience and aids effortless wayfinding, with a focus on revealing the textures and colours in the palette of materials and within the planting.
